Application/Control Number: 10/580,813 Page 2

Art Unit: 1644

DETAILED ACTION

1. Applicant's preliminary amendment received May 25, 2006 is acknowledged.

Claims 1-53 have been canceled.

Claims 54-111 have been added.

Claims 54-111 are pending in the instant application.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 54-60 and 65, drawn to peptide epitopes.

Group II, claim(s) 61-64, drawn to methods of making peptide epitopes.

Group III, claim(s) 66-69 and 107, drawn to methods of administering peptide epitopes.

Group IV, claim(s) 70-87, 92 and 106, drawn to antibodies that bind FcyRII.

Group V, claim(s) 88, 90, and 91, as they read on nucleic acids encoding peptide epitopes and host cell encoding said nucleic acids.

Group VI, claim(s) 88-91 and 108-110 as they read on nucleic acids encoding antibodies and host cell encoding said nucleic acids.

Group VII, claim(s) 93, as it reads on kits comprising peptide epitopes.

Group VIII, claim(s) 93, as it reads on kits comprising antibodies.

Group IX, claim(s) 94-105 and 111, drawn to methods of administering antibodies.

Application/Control Number: 10/580,813

Art Unit: 1644

3. The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Koenig et al. disclose in US patent 7,425,620 antibodies that discriminate between FcyRIIa and FcyRIIb, as well as methods of producing such antibodies and methods of using such antibodies in vaccines to treat various diseases and disorders (see entire document, particularly the abstract, columns 9-15, and claims 1-15). Thus the technical feature of discriminating between FcyRIIa and FcyRIIb does not distinguish the instant inventions over those of the prior art of Koenig et al. and thus the instant claimed inventions have been found to lack unity of invention.

Page 3

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species of Groups I-III, V, and VIII are the epitopes themselves. If applicant elects one of Groups I-III, applicant is to elect $Fc\gamma RIIa$ or $Fc\gamma RIIb$ and is further to elect a specific epitope within said $Fc\gamma RII$ polypeptide, such as amino acids 127-135 of SEQ ID NO:1. Note that the most preferable way to make such an election is by way of SEQ ID number, but that a fully responsive election does not require the use of SEQ ID numbers.

The species of Groups IV, VI, VIII, and IX are the epitopes that are bound by the anti-Fc γ RII antibodies. Concordant with the species election detailed above, a fully responsive election should clearly and explicitly delineate the sequence and position within a single specified Fc γ RII that is bound by the antibody. Again, SEQ ID numbers are the most preferred manner of indicating such a structure. Additionally, the election must indicate if the antibody is blocking or non-blocking for IgG to Fc γ R interactions, and if the antibody inhibits or activates Fc γ RII activity. Further, if group IX is elected, the specific disease or condition that is treated must be elected. Applicant is to elect a single, specific disease from those recited in the claims of Group IX. For example,

Application/Control Number: 10/580,813

Art Unit: 1644

election of "an autoimmune disease" would not be responsive whereas election of "Multiple Sclerosis" would be an example of a responsive election indicating a single, specific disease or disorder.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Page 5

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Szperka whose telephone number is (571)272-2934. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen O'Hara can be reached on 571-272-0878. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
